How to Get Jacked in Under 20 Minutes a Day

**Making it simple and achievable for
ANYONE to get in better shape**

All of these workouts are simple and things that can be done at home. If you don't know what something is (don't worry, that's how I started not too long ago) a quick google search is your friend.

THE BLUEPRINT

OUTLINE FOR SUCCESS:

1. Choose one movement for each body part from the phase that you are in. *(beginner, intermediate, advanced, pro)*
2. Choose 1 or 2 additional movements to do so that you can focus a little extra on a specific body part for the day. *(total 5 or 6 movements)*
3. Start your timer for 20 minutes *(or less but not more)*. My first 30 workouts or so were all under 15 minutes. Start smaller than you think so that you can build a habit and be sustainable. People's biggest mistake is that they start off too aggressive. Don't bite off more than you can chew.
4. Get through your circuit as many times as possible. **Push yourself!** Rest as little as you can. Be quick. 10 to 45 seconds between movements. Take a sip of water and keep going.
5. Go to the next phase when movements are too easy.
6. **Have fun and stay consistent.** Create accountability with a friend, group, or online! Accountability will help you succeed. Lean into accountability and you will not regret it. Day to day you might, because it will make you do the work when you don't want to lol. BUT, overall you will be grateful.

ALWAYS REMEMBER:

This program makes it simple and achievable but you
STILL HAVE TO PUT IN THE WORK!

"There are dozens of rules for success, but none of them work unless you do."

Keep stacking daily wins. — Little by little a little becomes a lot.

Be teachable and always feel free to reach out and ask questions.
WE ARE IN THIS TOGETHER.

HOW DO I KNOW WHEN IT'S TIME TO MOVE TO THE NEXT PHASE?

1. You Can Complete All Reps With Ease

If you finish the prescribed sets and reps and still feel like you have energy left, it's time to progress.

2. Your Form Stays Solid From Start to Finish

If you can maintain clean form without wobbling, slowing down, or compensating, you're ready for harder variations.

3. You Recover Quickly

If your muscles don't feel significantly challenged and you recover within minutes, it's likely too easy.

4. You're No Longer Sore or Fatigued the Next Day

Not every workout should crush you, but if you consistently feel nothing the day after, you've outgrown the stimulus.

5. Your Mind Isn't Challenged

If the exercise feels mentally boring or automatic, you're ready for the next step.

Rule of Thumb:

If you can perform 2 extra reps on your final set for 2 workouts in a row, it's probably time to move up a phase.

HOW TO PROGRESS BETWEEN PHASES

You don't have to jump phases quickly. Use these micro-progressions:

- Add **tempo** (*slower lowering*)
- Add **pause** reps
- Add **weight** (*kettlebell, backpack, etc.*)
- Add **volume** (*more sets or reps*)
- Add **range of motion**

If you push these and still feel under-challenged, move to the next phase.

YOU CAN BE IN DIFFERENT PHASES FOR DIFFERENT BODY PARTS

Progression is not linear and not identical across your whole body.

You might be Phase 3 for legs but Phase 1 for back — and that's completely normal.

Reasons why different phases might vary:

- You have more experience with certain movements.
- Some muscle groups adapt faster than others.
- Your home equipment might favor one area more than another.
- Injuries or mobility limitations may slow progress in one phase.

What this means for your workout:

You can mix phases inside the same session depending on your strength level **per muscle group**.

Example:

- Legs → Phase 3 (*Pistol Squats, KB Swings*)
- Chest/Arms → Phase 2 (*Decline Push-Ups, Floor Press*)
- Abs → Phase 1 (*Dead Bugs, Basic Crunches*)
- Back → Phase 2 (*KB Rows*)

This gives you:

- The right challenge for every muscle
- Faster progress
- Lower injury risk
- Better overall training balance

HOW TO DECIDE YOUR PHASE FOR EACH MUSCLE GROUP

Use this checklist:

Phase 1:

- ✓ You're learning the movement
- ✓ You struggle to finish reps
- ✓ Your form breaks early

Phase 2:

- ✓ You understand the movement well
- ✓ You can complete reps with good form
- ✓ You feel challenged but capable

Phase 3:

- ✓ You dominate the movement
- ✓ You complete reps with control
- ✓ You need explosive or weighted variations to feel challenged

Note:

It can be a good idea to have a goal number in mind for the total amount of reps for a workout. At first, I wouldn't stress about this too much, just do as much as you can.

Once you have done a few workouts and have a baseline, then you should be striving for improvement. Once you can do 10 to 20% more reps in the time frame than before, this can be a sign that you may want to make the workout more challenging.

FINAL THOUGHTS FROM SKYE,

First off I'm grateful for you. I wouldn't have gotten this far in my fitness journey if it weren't for all of you cheering me on and pushing me. So, THANK YOU.

We all start somewhere but the first important thing is that we start! From there you have to keep going. Keep stacking daily wins. Stay consistent and let them add up. Little things become big things. I promise! Progression isn't always linear, but as you keep moving forward you will find breakthroughs.

My advice is to make accountability part of your workout plan. Whether it is posting online, having a friend/partner join you, joining or forming a group, challenging those in your circle to a friendly competition, or any other creative ideas you may have, don't overlook accountability. Accountability will help you do the work on the days that you really don't feel like it. These days happen to all of us! Let's plan for those and get the job done.

If you have any further questions, the comment section of my videos and my personal DM's are open. No promises on response time but I will try my best and get to you. Persistence is key lol. But if I don't respond quick, the community we have built is all in on helping each other so I'm sure you will get some helpful answers! *(Also, google does wonders)*

We are in this together and I am cheering for you!

God bless,
Daily Reps Guy

ARMS/CHEST

PHASE 1 BEGINNER

Kneeling Push-Ups (*reduce load, build form*)
Chair Dips (*use sturdy chair, feet closer = easier*)
Bicep Curls (*Backpack*) — *fill with books*
Incline Push-Ups (*hands on counter or couch*)

PHASE 2 INTERMEDIATE

Standard Push-Ups
Close-Grip Push-Ups (*triceps emphasis*)
Kettlebell Floor Press (*one or two hands*)
Decline Push-Ups (*feet on chair*)
Feet-Elevated Dips (*chair behind + feet on another chair*)
Diamond Push-ups
Pike Push-ups
Kettlebell shoulder press
Chin-ups

PHASE 3 ADVANCED

Explosive Push-Ups / Clap Push-Ups
Archer Push-Ups
Kettlebell Push-Up Rows (*push-up → row → alternate*)
Body weight dips (*with Dip bars/parallel bars*)
Deficit push-ups
Kettlebell clean to press
Handstand push-ups
Tension push-ups (*hold at the bottom 5 to 30 seconds*
OR slow down for 4 to 8 seconds and quick up)

PHASE 4 PRO

Add weight to any of the Phase 3 movements. Weighted vest or kettle Bell weight increase.

LEGS

PHASE 1 BEGINNER

Bodyweight Squats
Reverse Lunges (*bodyweight*)
Glute Bridges (*bodyweight*)
Step-Ups (*small step/chair*)
Calf raises (*bodyweight*)

PHASE 2 INTERMEDIATE

Goblet Squat (*Kettlebell*)
Walking Lunges (*weight optional*)
Single-Leg Glute Bridge
Bulgarian Split Squats (*chair*)
Jump Squats
Jump Lunges
Kettlebell swings

PHASE 3 ADVANCED

Pistol Squat Progressions (*box pistol, assisted, full*)
Kettlebell Swing
Jump Squats
Weighted Step-Ups (*KB or backpack*)
Romanian Dead Lifts (*RDL's - with kettle bell or weight*)
Static Lunges with Kettlebell pass through legs
Glute Bridges (*with Kettlebell or weight*)
Kettlebell overhead squats
Bulgarian Split Squats (*with Kettlebell or weight*)

PHASE 4 PRO

Add weight to any of the Phase 3 movements. Weighted vest or kettle Bell weight increase.

ABS

PHASE 1 BEGINNER

Dead Bugs
Crunches
Leg Raises *(on floor)*
Plank *(20–30 sec)*
Penguins

PHASE 2 INTERMEDIATE

V-Ups
Hanging Knee Raises *(if doorway bar; otherwise tuck-ups)*
Side Planks *(30–40 sec)*
Russian Twists *(KB optional)*
Kettlebell marches
Plank shoulder taps
Mountain climbers
Kettlebell swings

PHASE 3 ADVANCED

Hanging Leg Raises *(full)*
Toe-to-Bars Progressions *(knee → L-raise → toe-touch)*
Plank Walk-Outs
KB Sit-Up to Press
Kettlebell overhead marches
Planks *(more than a minute with optional hip movement)*

PHASE 4 PRO

Add weight to any of the Phase 3 movements. Weighted vest or kettle Bell weight increase.

BACK

PHASE 1 BEGINNER

Supermans
Backpack Bent-Over Rows
Reverse Snow Angels
Doorway Isometric Pulls (*lean back + pull*)
Pull-ups/Chin-ups (*bands assisted*)

PHASE 2 INTERMEDIATE

Single-Arm Rows (*Kettlebell*)
Hip Hinge / Good Mornings (*backpack or bodyweight*)
Back Extensions (*bench or couch edge*)
Pike Push-ups
Pull-ups
Chin-ups
Inverted Doorway Rows (*towel around sturdy handle*
OR with dip bar/rings)

PHASE 3 ADVANCED

Kettlebell Renegade Rows
Kettlebell gorilla rows
Explosive Hip Hinges (*KB*)
Weighted Supermans (*light backpack held overhead*)
Kettlebell Clean and Press
Pull-ups/Chin-ups with weighted vest
Handstand push-ups
Inverted Rows (*with feet up on chair/bench*
and weighted vest optional)

PHASE 4 PRO

Add weight to any of the Phase 3 movements. Weighted vest or kettle Bell weight increase.

EXAMPLE

Beginner Workout Week

MONDAY FOCUS: ARMS/CHEST

Arms/Chest: Kneeling Push-Ups (*reduce load, build form*)
Legs: Reverse Lunges (*bodyweight*)
Abs: Leg Raises (*on floor*)
Back: Doorway Isometric Pulls (*lean back + pull*)
Focus set: Chair Dips (*use sturdy chair, feet closer = easier*)

TUESDAY FOCUS: LEGS

Arms/Chest: Bicep Curls (*Backpack*) — *fill with books*
Legs: Glute Bridges (*bodyweight*)
Abs: Plank (*20–30 sec*)
Back: Pull-Ups/Chin-Ups (*bands assisted*)
Focus set: Bodyweight Squats

WEDNESDAY — REST DAY

THURSDAY FOCUS: ABS

Arms/Chest: Incline Push-Ups (*hands on counter or couch*)
Legs: Step-Ups (*small step/chair*)
Abs: Penguins
Back: Supermans
Focus set: Dead Bugs

FRIDAY FOCUS: BACK

Arms/Chest: Kneeling Push-Ups (*reduce load, build form*)
Legs: Calf Raises (*bodyweight*)
Abs: Crunches
Back: Backpack Bent-Over Rows
Focus set: Reverse Snow Angels

SATURDAY

Arms/Chest: Chair Dips (*use sturdy chair, feet closer = easier*)
Legs: Reverse Lunges (*bodyweight*)
Abs: Leg Raises (*on floor*)
Back: Doorway Isometric Pulls (*lean back + pull*)

SUNDAY — REST DAY
